

# Plants from 20 to over 1000 kph

In twenty years of experience, Comac has become a leading company in the manufacture of keg plants: from 20 to over 1000 kph, from microbreweries to the biggest breweries worldwide, like Heineken, Inbev, Damm, Carlsberg, Efes.

The flexibility of the linear high-speed keg lines replaces the more traditional and rigid concept of the old rotating machines, with advantages in terms of outputs, performance, reduction of downtimes and maintenance times and costs.
